The Mind-Map Approach (MMA) for Attempting ALL RCs

1. Skim through the first byte of the passage
   - A byte is a logical piece that you can process in one look
   - Don't get caught up in the nuances
     - Just skim!

2. Answer yourself: WHAT did the byte DO?
   - WHAT is always simple & brief
     - It is free of How, Why, When, Where etc.
       - You can always come back to the passage

3. Skim through the next byte
   - Answer yourself: WHAT did the byte DO?
   - Link the WHAT of this byte with the WHAT of the earlier byte

4. Keep repeating Step 3 for each of the subsequent bytes

5. Read the question

6. Use grid for eliminating incorrect answer choices
